\*It's good for the environment, too.

# Pee green™

and enjoy the fiscal relief.

The Pee Green Economic Stimulus program is an unprecedented effort to boost your budget by cutting water waste and eliminating unnecessary labor waste. Each water-flushing urinal in your buildings may be draining as much as \$25 per day from your operating budget\*. So, how many urinals do you have? Do the math.

Even if your urinals are operating perfectly, each one is needlessly flushing tens of thousands of gallons. **Retrofitting with Falcon Waterfree urinals will eliminate 100% of the water-flushing drain on your budget and the environment.**

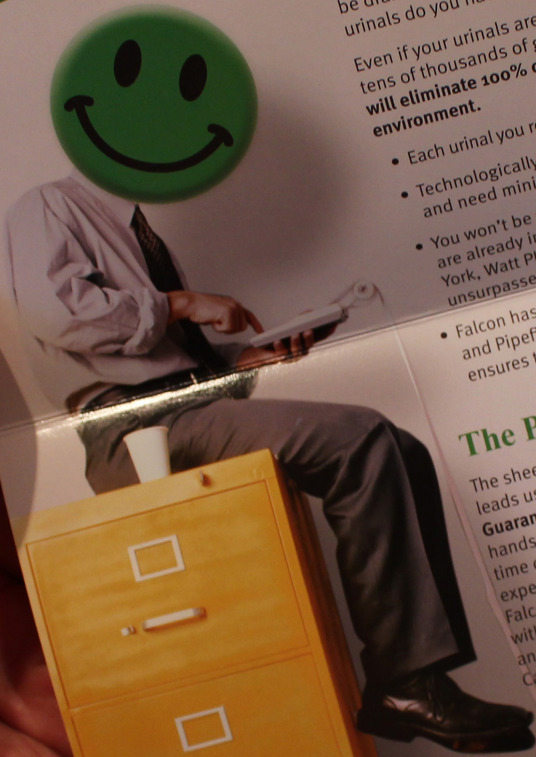

- Each urinal you replace will save, on average, 40,000 gallons of water per year.
- Technologically advanced, odor-free Falcon Waterfree urinals are reliable and need minimal maintenance (saving \$).
- You won't be taking a risk. More than 150,000 Falcon Waterfree urinals are already in use in buildings such as the Bank of America Tower in New York, Watt Plaza in Century City, to name a few. You too, can count on the unsurpassed performance and savings of Falcon Waterfree urinals.
- Falcon has a unique partnership with the United Association of Plumbing and Pipefitters (UA) and their local plumbers around the country. This ensures the highest level of installation expertise.

## The Pee Green Guarantee

The sheer number and extent of satisfied customers leads us to make a unique offer to you: **Satisfaction Guaranteed.** Falcon Waterfree urinals provide odor-free, hands-free, sanitary operation that saves money and time compared to flush urinal systems. Should you experience unsatisfactory performance with your Falcon Waterfree urinal system, we will work directly with you to ensure that your system operates properly and that it delivers the results we promised. Call now for more information.

\* One stuck flush valve operating at 3 gallons per minute wastes 4,320 gallons every day. Multiply this by your combined water and sewer rate, then add repair labor and parts for the total impact on your budget. Even small, difficult-to-detect leaks waste hundreds of gallons per day. Your retrofit with Falcon Waterfree urinals eliminates 100% of the waste and urinal plumbing emergencies.
